PROFESSIONAL SUMMARY

Passionate and results-driven Flutter Developer and Community Leader with a strong foundation in software engineering. Proven expertise in building scalable, cross-platform mobile applications featuring complex integrations such as Bluetooth Low Energy (BLE) and real-time data visualization. Award-winning problem solver with a track record of delivering innovative Health-Tech and E-commerce solutions. Committed to writing clean, efficient code and fostering technical excellence within teams. **Actively seeking a challenging Flutter Developer position to leverage my expertise in cross-platform development, drive successful app deployments to App Stores, and contribute to innovative software solutions.**

PROFESSIONAL EXPERIENCE

GDG Obour, PR Leader & Flutter Leader - Manage public relations initiatives, boosting community engagement by 40% and increasing tech event participation to 150+ attendees. - Direct the Flutter technical community by organizing 10+ workshops and coding sessions, successfully mentoring 30+ aspiring developers in mobile app creation.	09/2025 – Present Egypt
Ecradom, Flutter Developer - Develop, test, and deploy 3 robust cross-platform mobile applications using Flutter and Dart, successfully publishing apps to Google Play and Apple App Store. - Collaborate with UI/UX designers and cross-functional teams using Agile methodologies to translate design requirements into highly responsive user interfaces, improving rendering speed by 25%.	08/2025 – Present Zagazig, Egypt
Skilspire, Team Leader - Guided a team of 5 developers through the complete software development lifecycle, ensuring 100% timely delivery of 4 technical projects. - Facilitated code reviews, daily stand-ups, and Agile/Scrum practices to significantly improve team productivity and maintain high code quality standards.	02/2025 – 07/2025 Egypt
OI ROV, Software Engineering Contributor - Contributed to core software engineering tasks, developing efficient code that optimized overall system processing time by 15%. - Participated in comprehensive system testing, debugging, and continuous integration processes, reducing pre-launch software bugs by 20%.	12/2023 – 10/2024 Egypt

EDUCATION

Obour Institutes, Bachelor's Degree Student (Computer Science / Software Engineering) Expected Graduation: 06/2027 Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming (OOP), Mobile Application Development, Database Systems.	10/2023 – Present Egypt
--	----------------------------

TECHNICAL SKILLS

Programming Languages (Dart (Advanced) C++ (Intermediate))
Mobile Development (Flutter (Advanced) Cross-Platform Deployment (App Store & Google Play))
State Management & Architecture (BLoc, Cubit, Provider, Clean Architecture, SOLID Principles, MVVM)
Backend & Tools (Firebase (Authentication, Firestore), RESTful APIs, Git, GitHub, Postman)
Specialized Integrations (Bluetooth Low Energy (BLE), Real-time Data Visualization (FL Chart), AI API Integrations)
Methodologies & Soft Skills (Agile / Scrum Methodologies, Leadership & Team Management, Public Speaking, Working Under Pressure)

LANGUAGES

Arabic (Native) • English (Conversational)

AWARDS

1st Place Winner, Code Craft III, IEEE OCS <i>Recognized for developing an innovative software solution under a strict time limit.</i>	15/04/2026
1st Place Winner, Code Craft II, IEEE <i>Awarded for excellence in problem-solving and delivering a high-performance application.</i>	29/04/2025

PROJECTS

TODO App, Task Management Application - Developed a full-featured task management application utilizing Cubit (BLoC) for predictable state management and flutter_screenutil for a highly responsive UI. - Integrated a remote RESTful API using Dio, featuring custom interceptors for automatic JWT token refreshing, advanced error handling, and secure local storage using SharedPreferences. - Built comprehensive user flows including secure authentication, profile management with multipart image uploading, and categorized task tracking.	03/2026 – 03/2026
EEG Calm, Health-Tech Application - Engineered a health-tech mobile app designed to monitor brain activity and alleviate stress through breathing exercises. - Successfully implemented Bluetooth Low Energy (BLE) to connect the app with EEG headsets, enabling real-time brainwave data processing with zero latency. - Utilized FL Chart for interactive real-time data visualization and built a secure user authentication system using Firebase.	11/2025 – 11/2025
Bookia, E-commerce Book Store Application - Developed a feature-rich e-commerce application for browsing and purchasing books, utilizing Cubit for streamlined state management and a clean, feature-first architectural pattern. - Integrated backend RESTful APIs via Dio for user authentication and implemented secure token caching using SharedPreferences to facilitate seamless auto-login. - Engineered a highly engaging user interface with custom theming (Light/Dark mode support), interactive carousels, and responsive grid layouts for showcasing best sellers.	05/2025 – 06/2025

CERTIFICATIONS & COURSES

Flutter Development Certification, NTI (2026-02 – 2026-05)
Flutter Development Course, EraSoft (2024-12 – 2025-06)
