📁 PROJECTS

EEG Calm 📄, Flutter Developer 11/2025 – 11/2025
Developed a comprehensive health-tech mobile application designed to monitor brain activity and alleviate stress. The app connects to EEG headsets via Bluetooth Low Energy (BLE) to process real-time brainwave data. It features a secure authentication system using Firebase, interactive data visualization with FL Chart, and a personalized user experience with real-time alerts and breathing exercises

Horus Gym, Flutter Developer 01/2026 – Present
The Horus Gym app is a comprehensive fitness platform that combines personal training with sports shopping. Users can easily create an account via Google or email, then choose their preferred training path, whether it's cardio, bodybuilding, or nutrition. The app offers a categorized exercise library (such as back and biceps exercises), as well as an integrated store for purchasing products and supplements.
